Putting Science Totally Online! (1160)

Curriculum: Academics and Research

LEAD INSTRUCTOR / PANEL ORGANIZER / BOF LEADER:

James Brown, Ph.D., M.S., HCLD, Dean, Science, Engineering, Health Sciences and Human Performance, Ocean County College

Ocean County College (OCC) is one of the first community colleges in the Mid-Atlantic United States to develop and place most science offerings completely online. With both content and laboratory directed via distance learning, OCC has pioneered an innovative online delivery mode that utilizes Blackboard-CE6 and a home-delivered, safe, cost-effective, and environmentally-friendly laboratory kit from Hands-On Science. Course offerings in Biology, Chemistry, Physics, Anatomy and Physiology have attracted students from across the country. This initiative helped eliminate the need to for another science laboratory building, while providing the means for rapid expansion of the science program.

CONNECT TO COMMUNITY.

At SunGard Summit, come together as a community dedicated to education.

Putting Science Totally Online

Presented by: Dr. Jim Brown, Prof. Marc LaBella, Dr. Marcia Bradley, Prof. Maria Tamburro, Prof Christine Spencer and Dr. Felix Rizvanov

**Ocean County College
March 22, 2009
