

BOARD OF TRUSTEES

Bylaw, Policy, and Curriculum Committee Agenda Items

To: Board of Trustees

From: Office of the President

Date: December 4, 2025

The following Bylaw, Policy, and Curriculum Committee items are recommended to the Ocean County College Board of Trustees for approval at its meeting on Thursday, December 11, 2025:

- 1. Recommend approval of the following:
 - a. Revised 2025-26 Dental Hygiene Advisory Committee (Exhibit B-1)
 - b. New Policy
 - 1) Policy #9130, Information Technology, General, Employee Directory Information (Exhibit B-2)
 - c. Revised Policies with Number Change
 - 1) Policy #2240 to Policy #9100, Administration, Administrative Operations, IT Governance (Exhibit B-3)
 - 2) Policy #2220 to Policy #9120, Administration, Administrative Operations, Data Classification (**Exhibit B-4**)
 - 3) Policy #2230 to Policy #9200, Administration, Administrative Operations, Account Creation (Exhibit B-5)
 - 4) Policy #2540 to Policy #9310, Administration, Communication Systems, Responsible Use of College Digital Platforms (**Exhibit B-6**)
 - 5) Policy #2530 to Policy #9320, Administration, Communication Systems, Use of the Internet and OCC E-Mail (Exhibit B-7)
 - 6) Policy #2215 to Policy #9410, Administration, Administrative Operations, Artificial Intelligence (Exhibit B-8)

- d. Revised Policy with Name and Number Change
 - 1) Policy #2500, Administration, Communication Systems, Responsible Use of Communication Systems and Information Technology to Policy #9300, Information Technology, Administrative Operations, Information Technology Acceptable Use (Exhibit B-9)
- 2. Recommend approval of the following items as accepted by the College Senate at its meetings on November 6, and 20, 2025:
 - a. Revised Policy
 - 1) Policy #5140, Students, Registration, Credit for Prior Learning (Exhibit B-10)
 - b. Revised Programs
 - 1) Associate in Science Degree, Business Administration (Exhibit B-11)
 - 2) Associate in Science Degree, Computer Science (Exhibit B-12)
 - c. Revised Programs with Name Change
 - 1) Associate in Science Degree, Environmental Studies to Science (Exhibit B-13)
 - 2) Associate in Science Degree, Engineering to Math/Pre-Engineering (Exhibit B-14)
 - d. Reactivated Programs with Name Change
 - 1) Associate in Arts Degree, Global Studies to Humanities and Cultures (Exhibit B-15)
 - 2) Associate in Science Degree, Public Service to Behavioral Science and Public Service (Exhibit B-16)
 - e. New Courses
 - 1) BIOL 114L, Principles of Biological Science Lab (**Exhibit B-17**)
 - 2) BIOL 163L, Introductory Botany Lab (Exhibit B-18)
 - 3) BIOL 261L, Ecology Lab (Exhibit B-19)
 - 4) BIOL 265L, Marine Biology Lab (Exhibit B-20)
 - 5) ESOL 010, Beginner English Language (Exhibit B-21)
 - 6) ESOL 020, High-Beginner English Language (Exhibit B-22)
 - 7) ESOL 030, Intermediate English Language (Exhibit B-23)
 - 8) ESOL 040, Advanced English Language (Exhibit B-24)
 - f. Revised Courses
 - 1) ASLN 121, Interpreting Theory (Exhibit B-25)
 - 2) ENGL 151, English I (**Exhibit B-26**)
 - 3) MATH 270, Discrete Mathematics (Exhibit B-27)

Bylaw, Policy, and Curriculum Committee Agenda December 4, 2025 Page 3

- g. Revised Courses with Name Change
 - 1) BIOL 114, Principals of Biological Science to Principles of Biological Science Lecture (Exhibit B-28)
 - 2) BIOL 163, Introductory Botany to Introductory Botany Lecture (Exhibit B-29)
 - 3) BIOL 261, Ecology to Ecology Lecture (Exhibit B-30)
 - 4) BIOL 265, Marine Biology to Marine Biology Lecture (**Exhibit B-31**)
 - 5) MATH 158, Algebraic Modeling to Mathematical Modeling (Exhibit B-32)
- h. Inactivated Courses (for informational purposes)
 - 1) ARTS 188, Travel Seminar: World Art
 - 2) ENGL 296, Travel Seminar: Studies in Contemporary Literature
 - 3) HIST 240, Travel Seminar: Studies in History
 - 4) THTR 296: Travel Seminar: Theatre in London
- 3. Recommend the temporary suspension of Policy #8600, Campus Safety and Security, Alcohol and Substance Abuse, for the Community Medical Center Foundation and Ocean County College Foundation 4th Annual Miniature Golf Tournament on Friday, January 23, 2026, in the Jon and Judith Larson Student Center from 6:00 p.m. to 10:00 p.m.

APPROVED: November 6, 2025 **REVISED:** December 11, 2025

POLICY

Purpose

To uphold institutional data security standards while maintaining appropriate access to employee contact information for internal and external communications.

Policy Statement

In support of the College's commitment to cybersecurity and responsible data management, the following practices govern the publication of employee directory information:

1. Public Website Directory:

- The College's public-facing website will not display individual employee email addresses to mitigate risks associated with spam, phishing, and unauthorized data harvesting.
- General departmental email addresses will be provided only for departments that require direct interaction with the public. These addresses will serve as the primary point of contact for external inquiries.
- Employee names, titles, and office locations may be listed publicly, but individual contact details will be excluded.

2. Internal Directory (Intranet):

- A complete employee directory, including names, titles, office locations, phone numbers, and email addresses, will be maintained on the College's secure intranet.
- Access to this directory is restricted to authorized users through secure login credentials.

3. Governance and Oversight:

- Decisions regarding the publication of directory information are made at the discretion of the College, in accordance with institutional security protocols and operational needs.
- This policy will be reviewed annually by the College's Information Technology and Administrative Services teams to ensure alignment with evolving security standards.

ADOPTED: November 6, 2025

ADMINISTRATION
Administrative Operations
IT Governance #91002240

POLICY

The IT Governance Council ensures the effective and strategic use of technology resources in alignment with the mission, vision, values, and strategic initiatives of Ocean County College.

The Council will provide critical leadership in reviewing and approving technology-specific strategic plans, priorities, and proposed policies and in recommending and ranking projects for funding.

The Council is comprised of three committees: The Technology Evaluation and Assessment Committee, the Teaching and Learning Technology Committee, and the Data, Application, and Security Oversight Committee. The Council and each committee are comprised of up to twelve (12) members from throughout the college community. Members will remain on the Council for a two-year period. A call for volunteers to replace vacated seats will occur as needed.

The Council and its associated committees will work to improve the student learning experience, enhance data protection, security, and accessibility, and advance the effectiveness of the use of technology at Ocean County College.

Adopted: November 7, 2024

ADMINISTRATION ADMINISTRATIVE OPERATIONS <u>Data Classification</u> #91202220

Policy

Any person who uses, stores, or accesses data contained in the information technology systems (either academic or administrative) of Ocean County College has the responsibility to safeguard that data. Data classification is one method of determining the safeguard requirements for certain data and the appropriate College response to any unauthorized release of that data. Such safeguards and response plans are not only good stewardship for College data, but are required by certain state and federal law and regulations.

This policy governs the privacy, security, and integrity of College data stored on College IT systems and outlines the responsibilities of the individuals and organizational units that manage, use, access, store, or transmit that data. This policy supplements, but does not supersede, the College's Confidentiality Agreement.

- Ocean College IT Services maintains systems that store data essential to the performance of College business. All members of the College community have a responsibility to protect College data from unauthorized access, use, storage, transmission, disclosure, or destruction.
- II. All College data is classified into four levels of security: Restricted (Protected) Data, Confidential (Sensitive) Data, Internal (Directory) Data, and Public Data. For the purposes of this policy, data not formally classified (Unclassified Data) will be considered Sensitive Data. For the purposes of the College's Confidentiality Agreement, all data except Public Data is to be considered confidential.
 - a. Restricted or Protected Data is data that (1) if compromised would expose members of the College and its community to a high risk of identity theft or financial fraud and (2) is protected by Federal or state law or regulations. Applicable law and regulatory requirements include (but are not limited to) the Family Educational Rights and Privacy Act (FERPA), the Fair and Accurate Credit Transactions Act (FACTA), the Health Insurance Portability and Accountability Act (HIPAA), the Gramm-Leach-Bliley Act (GLBA), and other applicable Federal and New Jersey State laws. Examples of Protected Data include, but are not limited to:
 - i. Social Security number
 - ii. Driver's license number, Passport Number, or any State ID Number
 - iii. Credit card information (Number, expiration date, security code)
 - iv. Date of birth
 - v. Users' systems passwords
 - vi. Medical history
 - vii. Disability
 - viii. Student and family financial history
 - ix. Student account balances
 - x. Student Financial Aid history
 - xi. Student academic history, including student grades
 - b. Confidential or Sensitive Data is data that, while not explicitly protected by Federal

ADMINISTRATION ADMINISTRATIVE OPERATIONS <u>Data Classification</u>

#91202220

or State law, is proprietary to the College and would, if released, expose the College and members of the community to a heightened risk of identity theft or financial fraud. Examples of Sensitive Data include, but are not limited to:

- i. Employee salary or employment history
- ii. Permanent or local address
- iii. Department budgets
- iv. Student registration Personal Identification Numbers
- v. Internal operating procedures and operational manuals
- vi. Internal memoranda, emails, reports, and other documents
- vii. Technical documents, such as system configurations and floor plans
- c. Internal or Directory Data is data that the College chooses to keep private, but any disclosure would most likely not cause material harm. It can also be used for College communication or to link records between College systems or reports. This could include directory information that is widely available to members of the College community, but nevertheless should be handled with care, since exposure could result in increased risk of financial fraud or identity theft for the College and members of the community. Examples of Internal/Directory Data include, but are not limited to:
 - i. Departmental policies and procedures
 - ii. Grant applications
 - iii. Usernames
 - iv. Campus wide IDs
 - v. ID photos
 - vi. Class rosters/Advisor rosters
- d. Public Data is data that the College may or must make available to the public with no legal or other restrictions, via its website or various reports, press releases, and the like. Examples of Public Data include:
 - i. Information posted on the College's website
 - ii. The College phone directory
 - iii. The College's annual financial reports
 - iv. Data published in the Integrated Postsecondary Education Data System documents
 - v. Copyrighted materials that are publicly available
- e. When in doubt as to how any data should be classified among the four levels of security classifications above, contact your supervisor.
- III. The loss, unauthorized access to, or disclosure of Protected Data must be reported to the appropriate College officials, including the management of the organizational unit in which the data breach was discovered, the College's Chief Information Officer (CIO), and the Technology Helpdesk so that the appropriate response to the incident, including required notification of appropriate Federal and State agencies, can be initiated.
- IV. The loss, unauthorized access to, or disclosure of Sensitive Data should be reported to the management of the organizational unit in which the data breach was discovered for its

ADMINISTRATION
ADMINISTRATIVE OPERATIONS

<u>Data Classification</u>

#91202220

appropriate response.

- V. For the purposes of the College's Confidentiality Agreement, all data except Public Data are considered confidential. The unauthorized access, disclosure, or transmission of confidential information may result in disciplinary action by the College, including termination or expulsion, as outlined in the College's Confidentiality Agreement and other relevant College policies.
- VI. College data are assets belonging to the College. Departments which collect, use, store, and transmit College data should classify their data according to the level of risk associated with handling that data and implement appropriate safeguards to that data based on that risk. Data are generally stored in sets. The classification of a data set should be to the highest level of any data element in that set; for example, a report containing a combination of protected, sensitive directory and public data should be considered protected and provided with the safeguards appropriate for protected data. Individuals and departments must implement appropriate safeguards for accessing, transmitting, and storing College data. Examples of appropriate safeguards for Protected and Sensitive Data include, but are not limited to:
 - a. The data must be protected to prevent loss, theft, and/or unauthorized access, disclosure, modification, and/or destruction.
 - b. The data may only be accessed or disclosed if necessary for College business purposes and consistent with applicable College policies.
 - c. The data must not be downloaded, stored, or transmitted unless appropriately secured and/or encrypted.
 - d. The data must not be posted on any website or shared file storage space unless College standard authentication methods are used.
 - e. The data must be destroyed when no longer needed and in accordance with College policies.

An Information Security Classification Reference Guide is attached to this policy to assist in identifying data classification.

ADOPTED: June 29, 2023

#91202220

Information Security Classification Reference Guide - June 29, 2023

Public Use Data Intended for release to the public	Internal/Directory Data May be shared only within the OCC community	Confidential/Sensitive Data Intended only for those with a "business need to know"	Restricted/Protected Data Requires strict controls	
The College intentionally provides this information to the public. Examples:	The College chooses to keep this information private, but any disclosure would not cause material harm. Examples:	Disclosure of this information beyond the intended recipients may cause harm to the individual and/or the College. Examples:	Disclosure of this information beyond the specified recipients would likely cause serious harm to the individual and/or the College. Examples:	
 Public phone directories Student directory information* Marketing materials Course catalogs Annual reports Press releases Regulatory and legal filings *Directory information about students who have requested FERPA blocks must be classified and handled as Confidential/Sensitive data. 	 Departmental policies and procedures Grant applications Physical plant information that is not confidential or restricted Non-public building plans or layouts that are not confidential or restricted Campus wide IDs ID photos Class Rosters/Advisor Rosters 	 Non-directory student information Information protected under FERPA Personnel Records Donor information Budget/financial transactions Internal operating procedures and operational manuals Internal memoranda, emails, reports and other documents Technical documents such as system configurations and floor plans 	 Government issued identifiers such as Social Security Number, Passport number, Driver's License Number, or any State ID Number Individually identifiable financial account information such as Bank accounts, Credit/Debit Card information (number, expiration date, security code) Personally Identifiable Information (PII) User System Passwords/PINs Individually identifiable health or medical/disability information Student and family Financial Aid history, account balances, etc. 	

Feedback: If you have questions or concerns about the policy, or if you know of items that are out of compliance, please contact your supervisor or the College Chief Information Officer (CIO).

Use Your Good Judgement: The lists above are only examples and are not definitive classifications. When in doubt as to how any data should be classified among the four levels of

ADMINISTRATION
ADMINISTRATIVE OPERATIONS

<u>Data Classification</u>
#91202220

security classification, contact your supervisor.

ADMINISTRATION
ADMINISTRATIVE OPERATIONS
<u>Account Creation</u>
#92002230

Policy

Ocean County College provides user accounts to access College Systems, access to these accounts are at the discretion of Ocean County College Administration and can be revoked at any time. Standard processes for disabling and deletion of accounts and files associated with those accounts are outlined in procedures set by the OCC Office of Information Technology and OCC IT Governance.

Gaining access to an Ocean County College account does not give a user access to all OCC systems, access to systems are designated based on the role of the user.

Users with Ocean County College accounts are responsible for the way in which those accounts are used. Responsible Use of Communication Systems and Information Technology is outlined in Policy #2500. Data Classification and appropriate use of Data is outlined in Policy #2220. Improper use of the account can result in revocation.

ADOPTED: February 22, 2024

ADMINISTRATION
COMMUNICATION SYSTEMS
Responsible Use of College Digital Platforms
#93102540

POLICY

The purpose of Ocean County College's Digital Platforms is to enhance the mission of the College. These platforms include web sites, online forums, and social media. Some elements of these platforms are available to the community-at-large while others are restricted to certain segments of the campus community.

All content on these platforms must comply with local, state, and federal law, including ADA Regulations, College policies, and web standards identified in the <u>Digital Platform Standards Manual</u>. All content must also comply with and be directly related to College business or -courses. All statements contained within the content must be consistent with the College culture statements. All digital content, including links to external sites, are subject to review and approval by the College. The College retains the right to remove any material that it deems inappropriate or in violation of statute, regulation, or standards.

College employees or groups wishing to publish digital content should collaborate with the College Relations Office.

Adopted: September 26, 2005

Revised: April 27, 2023

Ocean County College, Toms River, NJ

ADMINISTRATION
COMMUNICATION SYSTEMS

Use of the Internet and OCC E-Mail #93202530

Formatted: Font: (Default) Arial, Bold

Formatted: Right

POLICY

Ì

Communication technology offers access through computers to people and information resources within the college and outside the college to the entire world. College faculty, staff and students via the Internet have access to electronic mail, college and university libraries, public libraries, information and news media, research institutes, governmental agencies, a variety of public domain software, and discussion groups on a wide variety of topics. Through the Internet, Ocean County College provides a resource for sending and receiving electronic mail worldwide.

Neither the College, nor any office or department thereof, is responsible for:

- 1. the content of mail messages that may appear in electronic mailboxes; or
- 2. the use of the information acquired through the college's electronic network.

Adopted: January 27, 1997

ADMINISTRATION COMMUNICATION SYSTEMS Use of the Internet and OCC E-Mail #2530

I. Use of E-Mail at Ocean County College

With communication access provided through college-owned hardware and/or software, the following statements are intended to guide college faculty, staff, and students in the use of the Internet and local Ocean County College e-mail.

- 1. Individual Responsibility
 - By accessing the College's email system, faculty, staff and students assume personal responsibility for its appropriate use and agree to comply with all applicable College codes of conduct, policies and procedures, as well as all applicable local, state, and federal laws and regulations. The individual is solely responsible for access and use of his or her personal email account and may not share his or her password or account with anyone.
- 2. Acceptable Use and Restrictions

Individuals should not assume that anything received, sent or stored on this system is private. The College generally, and system administrators specifically, will respect the privacy of users. However, these systems are not provided or intended for sending or receiving private or confidential communications. If material is stored electronically rather than in paper files, it must be just as accessible to others who need access to those files as any paper file. In addition, system administrators have access to all email and may monitor them as directed, to ensure efficient performance and appropriate use. If access discloses improper or illegal use, it will be reported and appropriate action taken. Legal processes, including requests for information under the New Jersey Open Public Records Act, may also compel disclosure.

The College reserves the right to refuse mail and other connections from outside hosts that send unsolicited, pornographic, mass or commercial messages, online purchase transaction acknowledgments or receipts, or messages that appear to contain viruses to the College's users, and to filter, refuse, or discard such messages. These emails can also be used to ensure adherence to all other procedures in this document.

Ocean County College strives to block offensive, indecent, and objectionable email.

The College's email system is provided to support the College's mission. Using the system for private business, personal gain, non-profit activities, advertising and fundraising not related to the College is prohibited. Excessive personal use with family and friends is also prohibited. Supplying an email address to vendors for things such as online purchases, financial transactions, and contests is strictly prohibited. Misuse can lead to penalties up to and including loss of system access, disciplinary action, or employment termination. Misuse would include, but not be limited to the following:

- Emailing, uploading, publishing, distributing, disseminating, transmitting or otherwise making available any content that is unlawful, harmful, threatening, abusive, harassing, defamatory, vulgar, obscene, libelous, hateful, or invasive of another's privacy.
- b. Emailing, uploading, publishing, distributing, disseminating, transmitting or otherwise making available any topic, name, material or information that incites discrimination, hate, or violence towards one person or a group because of their belonging to a race, a religion, or a nation, or that insults the victims of crimes against humanity by contesting the existence of those crimes.

ADMINISTRATION COMMUNICATION SYSTEMS Use of the Internet and OCC E-Mail #2530

c. Uploading files that knowingly contain viruses, trojan horses, worms, time bombs, corrupted files, or any other similar software or programs that may damage the operation or hardware of any or all systems.

Ocean County College supports free speech and academic freedom rights in electronic forms of communication, and individuals receive these rights as in other forms of communication. However, responsibilities are different because of the nature of the medium. Electronic messages may be accessible to unintended audiences. The College will not impose restraints or monitor content of communications except as required by applicable law and system administration requirements.

Email, like other user files, is kept as private as possible. Attempts to read another person's email will be treated with the utmost seriousness. The College and its administrators of central email system will not read mail unless necessary in the course of their duties. Also, there may be inadvertent inspection in the ordinary course of managing and maintaining the computer network and in carrying out other day-to-day activities.

An individual may not impersonate any person or entity, including, but not limited to, an Ocean County College employee, or falsely state or otherwise misrepresent any affiliation with a person or entity.

An individual has full responsibility for statements made via email. Such statements do not represent the opinions of the College or any other member of the College community.

Individuals should strongly discourage friends, family, associates, etc., from sending email that is not business related. This is especially true of email containing large attachments that are considered inspirational, educational, humorous, etc. These are usually of the file types such as JPG, WMV, MPG, AVI, MP3, etc. These files are usually not business related and tend to be very large, consuming large amounts of system resources while degrading system performance.

Email with unknown file types should not be opened, as these attachments could contain viruses, worms, Trojan horses, etc. These emails should be deleted immediately and then deleted from the "Deleted Items" folder.

Individuals may not conduct contests, pyramid schemes, advance chain letters or unsolicited email, send junk email, forge headers, manipulate identifiers to disguise the origin of any Content, or use the system in anyway for the purposes of spamming.

Actions that threaten the integrity of any system or its contents, the function of resources accessed through the system, the privacy or safety of anyone, or that are illegal, are strictly forbidden and could be subject to severe disciplinary action by the College and possibly local, state, and federal officials.

3. Privileges

The use of the Internet and e-mail systems is a privilege, not a right, and inappropriate use will result in a cancellation of that privilege.

4. Security

Security on any computer system is a high priority. Faculty, staff, or students who become aware of a security problem should notify the appropriate administrator at once. The user must not demonstrate the problem to other users. Faculty, staff, and students may not use another individual's account without

ADMINISTRATION COMMUNICATION SYSTEMS Use of the Internet and OCC E-Mail #2530

written permission from that person.

Updating and Storage

Updating

- The Office of Information Technology will occasionally require new registration and account information to continue the service. Users must notify the Office of Information Technology of any changes in the account.
- The Office of Information Technology will on a regular basis require all passwords to expire. New passwords must be reentered by each user as required.

 $\underline{\textbf{Storage}}$ The College's email system is comprised of both hardware and software. The system thereby has limitations based upon the design of the system. For this reason the following procedures are necessary to ensure system degradation does not occur:

- a. Storage limits Since the system has a finite of amount of space available for storage, it is essential that employee mailboxes have a size restriction. Based upon the College's current system, all users will be given a mailbox of 300 MB in size to store emails. Individuals will receive a warning email from the system should a mailbox reach 250 MB. At this point, the individual will need to delete unneeded emails. If a mailbox should reach 275 MB in size, the individual will only be able to send emails and not receive them. The individual will receive a warning message should a mailbox reach this size. If an individual allows an account to reach the 300 MB maximum size limit then emails will no longer be sent or received. Again, the individual will receive a warning message from the system should a mailbox reach this size. It is important that the individual maintain the mailbox on a regular basis by deleting email that is no longer needed.
- b. The college reserves the right to choose the email application that it will support. The college will be responsible for informing and training employees in any replacement system(s) it selects in a timely and thorough manner.

Finally, the College reserves the right to update these procedures at any time. Failure to comply with the terms and conditions of these procedures may lead to disciplinary action, including termination.

II. Use of the Internet at Ocean County College

With communication access provided through College-owned hardware and software, the following statements are intended to guide College faculty, staff, and students in the use of the Internet.

1. Acceptable Use and Restrictions

Use of a computer to access the Internet must be in support of educational or research activities and be related to official Ocean County College business. This applies to College-owned computers as well as computers you may personally own and bring onto the College or by accessing the College's network remotely. Use of another organization's network or computing resources via the Internet must comply with rules appropriate to both that network and the procedures set forth in this document.

ADMINISTRATION COMMUNICATION SYSTEMS Use of the Internet and OCC E-Mail #2530

Ocean County College does not actively monitor everyone's Internet use. However, it does retain the right to monitor any system or any employee's use of that system for legitimate business reasons. These include, but are not limited to, the following:

- Ensuring effective and/or secure operation
- · Keeping records of transactions the College is involved in
- Verifying employee compliance with laws or policies and procedures
- · Detecting or preventing crime
- Ensuring that unnecessary business and/or security risks are not undertaken through misuse
- The New Jersey Open Public Records Act

Restrictions - Users must not:

- a. Transmit and/or knowingly receive and misuse any material in violation of any Federal, State, or local laws. This includes, but is not limited to; confidential information, software or music piracy, hacking into unauthorized systems, intentional introduction of viruses or spyware onto the network, copyrighted material, patented information, threatening or obscene material, or material protected by trade secret.
- b. Use College computing systems for personal, commercial or political purposes.
- c. Monopolize systems in a shared resource environment, overload networks with excessive data, waste computer time, connect time, disk space, printer paper, manuals, or other college resources.
- Expand access to the network with the addition of personally owned switches, hubs, access points, or other types of network hardware and/or software.
- e. Utilize hardware and/or software designed to illegally capture network data.

2. Privileges

The use of the Internet is a privilege, not a right, and inappropriate use can result in a cancellation of that privilege, disciplinary action, or dismissal.

3. Network Etiquette and Privacy

Users are expected to abide by the generally accepted rules of network etiquette. These rules include, but are not limited to, the following:

- All users should be polite. They should never send, or encourage others to send, intentionally abusive messages.
- b. All users should use appropriate language. Faculty, staff, and students of Ocean County College are representatives of the College. What is said and done on the Internet can be viewed globally.
- c. Electronic mail is considered to be private information belonging only to the sender and those designated to receive the message. (See above, I, 2, e.)

4. Security

Security on any computer system is a high priority. Faculty, staff, or students who become aware of a security problem should notify the appropriate administrator at once. The user must not demonstrate the problem to other users.

5. Updating

 a. The Office of Information Technology may occasionally require new registration and account information to continue the service. Users must notify the Office of Information Technology of any changes in the account.

ADMINISTRATION COMMUNICATION SYSTEMS Use of the Internet and OCC E-Mail #2530

b. The Office of Information Technology may on a regular basis require all passwords to expire. New passwords must be reentered by each user as required.

Adopted: February 3, 1997 Revised: December 9, 1997 Revised: May 30, 2007

POLICY

Ocean County College's systems and personnel process (receive, store, process, transmit, and alter) a variety of sensitive and non-sensitive (public) information that must be handled in accordance with applicable laws, regulations, and best security practices. This information must be protected from unauthorized access, modification, and destruction and backed up or archived as appropriate for the level of sensitivity and criticality of the information.

"Generative AI refers to deep-learning models that can generate high-quality text, images, and other content based on the data they were trained on" (Martineau, 2023).

Publicly available applications driven by generative artificial intelligence (GenAI), such as chatbots or image generators, are impressive and widely popular. Examples of Generative AI (GenAI) include text-based and image-based tools. While these content-generating tools may offer attractive opportunities to streamline work functions and increase efficiency, they come with serious security, accuracy, and intellectual property risks.

This policy highlights the unique issues raised by GenAI, helps employees understand the guidelines for its acceptable use, and protects the College's confidential or sensitive information, trade secrets, intellectual property, workplace culture, commitment to diversity, and reputation.

Purpose: The purpose of this policy is to establish standards for the use of artificial intelligence (AI) tools, software, and systems on the College's infrastructure. Students and faculty looking for guidance on AI in the classroom should refer to Policy #5180, Classes and Instruction, Academic Integrity.

Scope: This policy applies to all systems and information owned, managed, or processed by Ocean County College and its authorized personnel. This policy also applies to any external or non-Ocean County College system that interconnects with or exchanges data with Ocean County College-owned or managed systems.

Policy: This policy addresses the use of any third-party or publicly available GenAI tools, including text-based and image-based applications that mimic human intelligence to generate answers, work products, or perform certain tasks. Note that this policy may not address other GenAI or AI tools formally approved or installed for your use by the College.

Do not upload or input any confidential, proprietary, or sensitive College information into any GenAl tool. Examples include passwords and other credentials, FERPA-protected information, Protected Health Information (PHI), personnel material, information from documents marked Confidential, Sensitive, or Proprietary, or any other nonpublic College information that might be of use to malicious entities or harmful to the College if disclosed. Failure to follow this policy may breach your or the College's obligations to keep certain information confidential and secure, risks widespread disclosure, and may cause the College's rights to that information to be challenged.

Adopted: April 24, 2025

Ocean County College, Toms River, NJ	ADMINISTRATION
	COMMUNICATION SYSTEMS
	Responsible Use of Communication
	Systems and Information Technology #2500

POLICY

Ocean County College will provide or contract for the communications services and technological equipment necessary to gain access to information resources which promote its mission and goals and to provide an atmosphere which encourages the free expression of ideas. Access to communication resources is a privilege to which all members of the college community whose work requires it are entitled. Certain responsibilities accompany that privilege and understanding them is important for all communication technology users.

The College expects that all members of the academic community will respect the rights of others and comply with all the laws that pertain to communication and communication technology. Information technology provides a means of communication, both public and private. Users and system administrators will respect the privacy of person-to-person communication in all forms, including voice (telephone), text (regular mail, electronic mail and file transfer), and image (graphics and television).

The College vests the responsibility for ensuring the integrity and performance of its various communication systems with various administrators. While respecting the rights of all users, when the use of a communication system unnecessarily impedes the communication activities of others, system administrators are authorized to take those actions necessary to maintain the system and are fully accountable for their actions.

Communication systems and information technology may be used for purposes related to academic studies, the discharge of professional responsibilities by employees, official business with the college, and other college-sanctioned activities. Improper use of communication systems and information technology includes, but is not limited to the following:

- deliberate harassment of other users;
- intentional destruction of or damage to equipment, software, or data belonging to OCC or other users;
- unauthorized copying of copyrighted material;
- intentional disruption of communication systems;
- sending forged email or chain letters that may interfere with system efficiency;
- violation of system securities;
- violation of computer software license agreements;
- unauthorized use of computer accounts or access codes;
- --- academic dishonesty (plagiarism, cheating); or
- use of a communication system for private business purposes.

College users can facilitate computing in a shared resource environment through:

- regular deletion of unneeded files from accounts on central or networked computers;
- refraining from overuse of connect time, information storage space, printing facilities, or processing capacity;
- refraining from overuse of interactive network facilities.

Violation of the statements described above will be dealt with in accordance with normal disciplinary procedures of the college. Illegal acts involving College communication resources may also be subject to prosecution by state and federal authorities. The College reserves the right to extend, limit, restrict, or deny privileges and access to its communication systems based on institutional priorities and financial considerations, as well as, when presented with evidence of a violation of this and other College policies, or state and federal laws.

Ocean County College, Toms River, NJ	ADMINISTRATION
	COMMUNICATION SYSTEMS
	Poenoneible Lies of Communication
	Systems and Information Technology, #2500
	Systems and information recrimology #2500

PROCEDURE

- 1. Supervisors are responsible for instructing or providing college-supported training opportunities for employees on the proper use of the communication services and equipment used by Ocean County College for both internal and external professional communications. Communications equipment and services include, but are not limited to, U.S. mail, college mail, electronic mail, Internet connections, courier services, facsimiles, telephone systems, computer networks, online services, computer files, video equipment and tapes, tape recorders and recordings, pagers, cellular phones, and bulletin boards.
- 2. Most communication services and equipment have toll charges or other usage-related expenses.

 -Employees should be aware of these charges and should consider cost and efficiency needs when choosing the proper vehicle for each professional communication.
- 3. Employees should not use college communication services and equipment for personal purposes except in emergencies or when extenuating circumstances warrant it. When personal use is unavoidable, employees must properly log any user charges and reimburse the college for them. However, whenever possible, personal communications that incur user charges should be placed on a collect basis or charged directly to the employee's personal credit card or account.
- 4. College communications equipment may not be removed from the premises without written authorization from the employee's supervisor.
- Employees should exercise care so that no personal correspondence appears to be an official communication of the college. Employees may not use college stationery or postage for personal letters.

ver, NJ INFORMATION TECHNOLOGY
ADMINISTRATIVE OPERATIONS
INFORMATION TECHNOLOGY ACCEPTABLE USE #9300

POLICY

Purpose

Ocean County College (OCC) provides a robust information technology infrastructure to support its academic, administrative, and operational mission. This infrastructure includes network access, internet connectivity, and information processing systems for students, faculty, and staff. To ensure the integrity, security, and optimal performance of these systems, OCC enforces principles of acceptable use through this policy.

Scope

This policy applies to:

- All OCC-owned, managed, or processed systems and information.
- All authorized OCC personnel and users.
- Any external or non-OCC systems that interconnect with or exchange data with OCC systems.
- All devices used to access OCC systems, including OCC-issued equipment, personal computers, mobile devices, and other electronic devices.

Compliance Requirements

OCC is required to comply with the Gramm-Leach-Bliley Act (GLBA), which mandates adherence to the security standards outlined in NIST Special Publication 800-171, Revision 3, *Protecting Controlled Unclassified Information in Nonfederal Systems and Organizations*.

Acceptable Use Guidelines

Users are granted access to OCC's information systems and resources solely to perform their academic or job-related responsibilities. Personal use is not permitted. All users must:

- Use OCC systems in a manner that protects the confidentiality, integrity, and availability of information assets.
- Comply with all applicable federal, state, and local laws, as well as OCC policies and standards.
- Understand that access and use of OCC systems is a revocable privilege and employees and students may be subject to disciplinary action for inappropriate use of OCC systems.
- Be accountable for all activities conducted under their OCC accounts, regardless of location or device used.

Privacy and Monitoring

ver, NJ INFORMATION TECHNOLOGY ADMINISTRATIVE OPERATIONS INFORMATION TECHNOLOGY ACCEPTABLE USE #9300

Users should have no expectation of privacy when using OCC equipment or systems. OCC reserves the right to access, monitor, and review information stored or transmitted through its systems for legitimate purposes, including but not limited to:

- Emergency resolution.
- System performance monitoring and security incident response.
- Internet usage monitoring, including remote access.
- Data backup and recovery operations.

Information may also be accessed or disclosed to external parties without prior notice when required for:

- Compliance with the New Jersey Open Public Records Act (OPRA).
- Response to valid subpoenas, court orders, or legal discovery requests.
- Internal or external audits, investigations, or inquiries.
- Execution of necessary business operations.

All electronic information created, stored, or transmitted using OCC systems is considered property of the College, unless explicitly stated otherwise.

Privileged Access

OCC IT personnel and other authorized users with elevated access privileges must exercise their roles responsibly. Access to user information is permitted only when:

- Required for system maintenance or security.
- Supported by adequate cause and reviewed by the appropriate College Officer or the IT Governance Committee.

Enforcement

Violations of this policy may result in disciplinary action, including revocation of access privileges, legal action, or other consequences as deemed appropriate by OCC.

Restricted Services

To safeguard OCC's sensitive information, the following services are restricted. This list is not exhaustive; users must exercise discretion when using any third-party technology not explicitly approved by OCC. When in doubt, consult OCC's Technology Department or IT Governance Committee.

Restricted services include:

1. **Social Media Platforms -** Personal or professional social media tools must not be used to store or communicate OCC information classified as confidential, private, or sensitive. Refer to the Social Media Policy for additional guidance.

ver, NJ INFORMATION TECHNOLOGY ADMINISTRATIVE OPERATIONS INFORMATION TECHNOLOGY ACCEPTABLE USE #9300

- Third-Party Cloud Services Confidential OCC data must only be stored in OCCmanaged cloud environments. Use of personal or external cloud storage solutions is prohibited unless explicitly approved by IT Governance.
- 3. **Third-Party Email Services -** OCC information classified as confidential or sensitive must not be transmitted or stored using non-OCC email services. Auto-forwarding to external email accounts is prohibited unless approved.
- 4. **Text Messaging (SMS/MMS) -** These services must not be used to transmit OCC confidential or sensitive information.
- 5. **Video Conferencing Tools -** Use is limited to OCC business and educational purposes. Users must ensure that sessions are configured to prevent unauthorized access to sensitive discussions or materials.
- 6. **Unapproved Chat Services -** OCC confidential or sensitive information must not be communicated or stored using chat platforms not approved by OCC IT.
- 7. **File Sharing Software (e.g., BitTorrent) -** Use of peer-to-peer file sharing software is prohibited unless explicitly approved for academic or business purposes by IT Governance.

Unauthorized Recording

The College prohibits the unauthorized recording of any work-related meeting, conversation, phone call, video call, or other form of communication. This includes audio, video, and screen recordings, as well as the use of any device or software designed to capture or store conversations. Employees may not record interactions involving coworkers, supervisors, students, vendors, or other members of the College community without prior authorization from Human Resources and the informed consent of all participants.

The College reserves the right to record meetings, training sessions, or other official events for legitimate business, academic, or compliance purposes. When the College initiates a recording, a message will be posted notifying all participants that the session is being recorded. Recordings will be managed in accordance with applicable laws and College policies.

This policy applies to recordings made on College-owned devices, personal devices, or any third-party platform. Violations may result in disciplinary action, up to and including termination.

Non-Compliance and Sanctions

Violation of this policy may result in disciplinary action, up to and including termination of employment, revocation of access privileges, and legal consequences. OCC reserves the right to investigate suspected violations and take appropriate action to protect its systems, data, and community.

ADOPTED: December 8, 1997 Revised: December 11, 2025

STUDENTS EXHIBIT B-10 REGISTRATION Credit for Prior Learning #5140

POLICY

Students may earn credit for prior learning gained through non-traditional or non-college-credit educational experiences, employment, volunteer work, etc., or classroom work at unaccredited institutions through:

1. Credit By Examination

This policy applies only to fully matriculated students, either full-time or part-time. Credit by examination is considered "transfer credit."

Fully matriculated students can earn credit for what they already know by earning qualifying scoreson standardized tests or through training and educational program evaluations, as assessed byrecognized college-credit recommending services and/or evaluations by other accreditedinstitutions for which OCC has current course equivalencies as recommended by the Deans and approved by the Academic Standards Committee. (See policy attachment)

Credit for learning from unaccredited* institutions and/or work and other appropriate life-experiences may be granted for appropriate courses on the basis of examination. The Vice-President of Academic Affairs will approve the granting of such credit upon recommendation of the appropriate Department Administrator as follows: In-house Credit By Examination — Dean or designee of the appropriate school; Standardized Tests — Registrar; Non-Credit to Credit — Executive Director of Workforce and Professional Education or designee. Examinations will be standardized when possible, including both oral and written portions as well as practical-performance where applicable. Students will be permitted to take an in-course-credit by examone time only. Students who have previously taken the course for credit at Ocean County-College will not be permitted to subsequently take in-house Credit By Examination. A fee shall be assessed for each examination of this type as indicated in Policy #5300: Tuition/Fee Schedule.

2. Portfolio Assessment

Students may earn credit through portfolio assessment for experiential learning. The-assessments may be done by Thomas Edison State University Office of Prior Learning-Assessment/Portfolio, and a maximum of 30 semester hours may be transferred back to Ocean County College in accordance with College policy #5128. Ocean County College, on a case-by-case basis, may conduct Prior Learning Assessment through portfolio evaluation for classes that readily lend themselves to such assessments, as approved by the Vice President of Academic-Affairs and the School Dean or their designees.

Portfolio assessment credit is considered "transfer credit." Students will be permitted to submitan in-house Portfolio Assessment one time only. Students who have previously taken the course for credit at Ocean County College will not be permitted to subsequently submit an in-house Portfolio Assessment. A fee shall be assessed for each assessment of this type as indicated in-Policy #5300: Tuition/Fee Schedule.

*Accredited institutions are those that have been accredited by one of the regional institutional accrediting bodies recognized by the American Council on Education. All other institutions are considered unaccredited.

STUDENTS EXHIBIT B-10
REGISTRATION
Credit for Prior Learning #5140

Prior Learning Assessment (PLA) is the process by which OCC awards academic credit for verified college-level skills and knowledge acquired outside the classroom. The purpose of this policy is to establish and formalize prior learning assessment and non-academic credential review as a recognized methodology for meeting the educational needs of prospective, current, and legacy Ocean County College (OCC) students, the community, and OCC's partner organizations. This policy applies only to fully matriculated students, whether enrolled full-time or part-time.

The AS in Business Administration is designed for those students desiring to transfer to a baccalaureate program in business. This degree is a broad program of study that provides students with specific skills as well as a general overview of business topics.

Program Objectives

Program Goals

	Program goals
PG1	N/A

Program Learning

Outcomes

	Students who successfully complete this program will be able to:
PLO1	Analyze the concepts, principles, and operations of the private enterprise system . 2.
PLO2	Compare and contrast types of businesses and forms of business ownership.
PLO3	Evaluate the impact of global markets and international competition.
PLO4	Discuss the role of management in developing an organizational <u>structure</u> , <u>applying</u> <u>this to a variety of organizations and entities</u> .
PLO5	Describe the relationship between production and consumption.
PLO6	Examine the marketing function and describe the concepts and processes involved in designing <u>and applying</u> product strategy, promotional strategy, distribution strategy, <u>and and and pricing strategy across a variety of business and organizations.</u> <u>strategy.</u>
PLO7	Develop awareness of how government decisions can influence the business environment in a variety of industries and situations. environment.
PLO8	Develop an awareness of factors which would enhance leadership activities.

	Students who successfully complete this program will be able to:					
PLO9	Evaluate financial transactions and financial statements for sole proprietorships,					
	partnerships, and corporations.					
	Creatively explore concepts and question-established ideas.

1

Many four-year business degree programs require Precalculus or Calculus as the entry-level math course. Students planning to transfer to Stockton University business programs should take Statistics. Kean Ocean students should take College Algebra and a second math course in Precalculus.

2

A variety of STSC -Student Success Seminar courses are available.

3

Any student planning to transfer to a Stockton University business program should take ACCT 263. Other elective choices may depend upon chosen OCC business major.

The program outlined here will prepare students for transfer to a four-year college to obtain a Bachelor of Science degree in Computer Science and provide a solid base of knowledge for a career in the Computer Science field. The curriculum follows closely program requirements of prominent four-year higher education institutions in New Jersey and is designed to address the preparation of our students for a future in Computer Science.

Program Learning

Outcomes

	Students who successfully complete this program will be able to:
PLO1	State the basic concepts of a modern computer architecture including the main functions of an operating system and ancillary software and how the major computer data, instruction and addressing formats influence computer performance.
PLO2	Describe the software development life cycle(SDLC) and how it applies to recognizing solutions to the problems involved in program portability and data design by collecting, organizing and evaluating information
PLO3	Illustrate the benefits of Object-Oriented software development and the rational of derived classes (including private, protected and public data members and methods).
PLO4	Analyze (big O) algorithms for sequential and binary searches, hashing, and common selection, exchange and insertion sorting algorithms
PLO5	Differentiate between the concepts, data structure and benefits involved in logically representing common data structures, such as tables, ordered lists, stacks, queues and trees.
PLO6	Demonstrate independent thinking through mathematical, scientific, and philosophical reasoning.
PLO7	Explain how technology has had an impact on society and the environment.
PLO8	Demonstrate knowledge and skills in the areas of Computer Science to solve technical and computational problems.

This program is designed to prepare students for careers in the essential coursework dynamic field of environmental science, which is concerned with monitoring humanity's impact on the Earth and prerequisites for transferring to a four-year college or university, solving environmental problems. Students graduating from this program can continue their undergraduate studies in research, pharmaceuticals, and requirements for pre-professional programs, such as doctorate studies in medical, veterinary, and chiropractic programs. Students graduating from this program might work in environmental education centers, public relations firms, testing labs, environmental research organizations, travel/tourism (ecotourism companies), food manufacturers, waste management companies or governmentagencies. The course work program provides the students with a solid foundation strong background in math, science, and general education studies, the natural sciences. The sciences covered by this program include, Biology, Chemistry, Environmental, and Physics.

Program Objectives

Program Goals

PG1 NA

Program Learning Outcomes

	Students who successfully complete this program will be able to:
PLO1	Develop a foundation across the subdisciplines of biology, chemistry, environmental science and physics. Demonstrate comprehension of ecosystems structure and functions.
PLO2	Analyze information through formulating hypotheses, analyzing data using scientific methods, and developing the ability to interpret quantitative data. Analyze community habitat dynamics:
PLO3	Explain the concepts of each subcategory with respect to the accepted Laws governing scientific concepts. Discuss the natural cycles that influence the environment and living organisms.
PLO4	Demonstrate application of critical thinking and teamwork in the classroom and lab. Identify and critically analyze environmental dilemmas and processes:
PLO5	Apply scientific principles to current issues in today's society Demonstrate application of critical thinking and team work in classroom and in the field.
PLO6	Discuss the dynamics between environmental ethics, economic and social values and their impact on the Earth in both the immediate time and the future.
PLO7	Demonstrate knowledge and skill in using the latest instrumentation techniques and methodologies used in environmental science.
PLO8	Demonstrate application of critical thinking in classroom and in thefield.
PLO9	Communicate effectively in speech and writing using the terminology that is unique to environmental science:
PLO10	10.Use critical thinking and problem solving skills in analyzing environmental science problems. 11.Use accepted scientific methods in collecting, organizing and evaluating the data gathered and draw a data supported conclusion. 12.Recognize and appropriately respond to ethical issues in the field of environmental science.

This program is designed to prepare students for the essential coursework and prerequisites for transferring to a four-year university/college. Students graduating from this program can continue their undergraduate studies in their chosen pathway of Mathematics, Mathematics, Mathematics, Mathematics, Mathematics, In the coursework provides the students with a solid foundation in mathematics or Civil/Mechanical pre-engineering studies.

The Associate in Science Engineering degree program is designed to prepare engineering students to successfully transfer to baccalaureate engineering programs in the following areas: Biomechanical, Civil/Construction, Electrical, Industrial, Mechanical or GeneralEngineering. Participants in the associate program will enroll in science, mathematics, engineering, and engineering technology courses that provide serious students with the knowledge and background necessary to take upper level courses in their chosen field of study as well as prepare them to participate in experiential learning opportunities in industry.

Program Learning Outcomes

	Students who successfully complete this program will be able to:
	Students who successfully complete this program will be able to:
PLO1	Apply logic, quantitative reasoning, and mathematical techniques to analyze and
	solve problems in science, technology, and engineering. Perform analysis of
	engineering problems starting with establishing design
	concepts and ending with providing multiple and sustainable solutions to
	engineering problems.
PLO2	Communicate technical concepts clearly by constructing written explanations,
	delivering oral presentations, and producing visual representations for diverse
	audiences. Interpret, translate, and analyze physical problems using mathematical
	tools, scientific theory, engineering and technical knowledge, and industry
	practices.
PLO3	Ethically employ technology and computational tools (e.g., graphing software,
	programming languages, computer algebra systems) to collect, analyze, and
	interpret data in mathematical and engineering contexts. Use teamwork and
	organizational skills in carrying out design and problem-solving projects.
PLO4	Work effectively in teams to solve complex, multi-step problems, demonstrating
	respect for diverse perspectives and contributions.
	Present technical information in oral, written, and graphic form.
PLO5	Demonstrate career-aligned professional skills, ethical responsibility, and
	adaptability in academic and applied settings, preparing for transfer to four-year
	programs and future career paths. Display creative and critical thinking in
	connection with engineering
	applications.
PLO6	Evaluate the impact of technology on social, economic, and environmental
	sustainability, and apply ethical reasoning in engineering and mathematical
	problem-solving to enhance efficiency and achieve goals. Communicate effectively
	using specialized engineering terminologies
	through reading, listening, speaking, and writing.
PLO7	Solve problems by collecting, organizing, and evaluating information and
	utilizing powerful engineering tools.
PLO8	Develop an understanding of technology and its impact on the three key aspects or
	sustainability:social, economic, and environmental.

The Associate of Arts (A.A.) in Humanities and Cultures introduces students to the study of human thought, expression, and experience through humanities concentrations such as literature, philosophy, religion, world languages, and history. The degree develops critical thinking, communication, and cultural awareness while providing a strong foundation for transfer to four-year programs in humanities-related fields.

The Global Studies program allows students to complete the first two years of their college education by selecting courses from a range of offerings based on their interest and transfer needs. These courses prepare students to transfer to baccalaureate programs with majors in global studies, international politics, and foreign relations.

Program Objectives

Program Goals

	Program goals
PG1	N/A

Program Learning

Outcomes

	Students who successfully complete this program will be able to:
PLO1	Demonstrate an understanding of human thought, expression, and a set of cultural values through the study of the humanities.">human thought, expression, and a set of cultural values through the study of the humanities. and beliefs other than their own.
PLO2	Read, interpret, and evaluate texts, artifacts, and cultural expressions using critical, historical, and theoretical approaches. Discuss the impact of modernity and technology on tradition and demographic change in lesser developed countries.
PLO3	Produce clear, well-organized, and well-supported written and oral communication appropriate to humanities disciplines. Apply the knowledge base from many disciplines to the study of the international community.
PLO4	Recognize and analyze diverse cultural perspectives and traditions, demonstrating awareness of global and historical contexts. In their native language — and possibly in another world language — demonstrate oral and written language skills which promote global communication.

3 of 9 11/18/25, 7:10 AM

<u>6</u>

	Students who successfully complete this program will be able to:
PLO5	Demonstrate an awareness of international career and study opportunities in government, business, education, and in organizations servicing international concerns.
PLO5	Examine moral, philosophical, and humanistic questions using reasoned argument and ethical reflection.
PLO6	Employ critical and creative thinking to form independent interpretations and arguments about human culture and meaning.
PLO7	Demonstrate foundational knowledge and skills that support transfer to baccalaureate programs in the humanities.

The Associate in Science (A.S.) degree program allows students to successfully complete a program of study in one of several areas of <u>Behavior Science and Public Service.</u>

public service. Program graduates may transfer to a four year institution and/or directly enter theworkforce.

Program Objectives

Program Goals

	Program goals
PG1	NA

Program Learning

Outcomes

	Students who successfully complete this program will be able to:
PLO1	Students will communicate effectively in both speech and writing.

2 of 8 11/18/25, 7:11 AM

	Students who successfully complete this program will be able to:
	Contribute to the work of a public service agency by carrying out projects aligned with the agency's mission.
PLO2	Students will use social science theories and concepts to analyze human behavior and social and political institutions.
	Describe a public service agency's method of service delivery, its networks, resources, and constituents.
PLO3	Students will understand the importance of a global perspective and culturally diverse peoples. Discuss ongoing and emerging public service issues.
PLO4	Students will understand ethical issues and situations. Explore legal and ethical parameters of public service.
PLO5	Students will demonstrate independent/critical thinking in the humanities, natural sciences, and social sciences. Describe how the public service agency partners or collaborates with similar agencies to carry out its mission.

1. Course Information

Subject BIOL - Biology

School Science, Technology, Engineering,

Mathematics

Course Title Principles of Biological Science Lab

2. Hours

Semester Hours 1.0

Lecture 0.0

Lab 2

Practicum 0.0

3. Catalog Description

For display in the

online catalog

This hands-on laboratory course complements the concepts introduced in BIOL 114 and provides students with foundational experience in biological investigation. Through a series of experiments, students will apply the scientific method, explore the principles of osmosis and diffusion, and gain proficiency in microscope use. Activities include the dissection of representative organisms, DNA extraction, and the examination of cell types and structures. Students will also investigate biological classification systems and practice identifying key traits across major taxonomic groups. Emphasis is placed on observation, data collection, and critical thinking. No prior lab experience required.

4. Requisites

Prerequisites

None

Corequisites

For the first attempt, BIOL 114 lecture must be taken with BIOL 114L. If the student should fail either lecture or lab after the first attempt, then they may take the individual failed section.

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

Describe the need for this course

This course is needed for students entering college who have not had a high school biology course or who wish to reinforce their biological science background before going on to further study.

The course addresses the need for greater scientific literacy by introducing students to some basic concepts in the living world and how these concepts are interrelated. The course also addresses the need of the students to develop and use critical thinking

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

General Education

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:		
CLO1	Metric system		
	Accurately measure and record length, mass, volume, and temperature using		
	standard metric units (e.g., meters, grams, liters, and degrees Celsius).		

	Students who successfully complete this course will be able to:
	Perform conversions between different units of measurement within the metric system (e.g., milliliters to liters, micrograms to grams).
	Apply scientific notation when representing very large or very small measurements.
CLO2	Microscopes Properly operate and care for a compound light microscope and a dissecting microscope.
	Calculate the total magnification of a specimen and describe the relationship between magnification and the field of view.
	Prepare wet mount slides of specimens for observation.
	Identify and label the key parts of a microscope and explain their functions.
CLO3	Cells: Prokaryotes and eukaryotes Distinguish between prokaryotic and eukaryotic cells based on fundamental structural differences.
	Examine and identify the key organelles within typical plant and animal eukaryotic cells using a microscope.
	Compare and contrast the cellular structures observed in prokaryotes, plant eukaryotes, and animal eukaryotes.
	Observe and draw representative examples of prokaryotic (e.g., bacteria) and eukaryotic (e.g., plant, animal, protist)

	Students who successfully complete this course will be able to:
CLO4	Osmosis and diffusion
	Define and describe the principles of diffusion and osmosis.
	Perform an experiment to demonstrate the process of osmosis
	Interpret the effects of hypertonic, hypotonic, and isotonic solutions on plant and animal cells.
	Measure and analyze quantitative data to determine the effect of solute concentration on the movement of water across a semipermeable membrane.
CLO5	Paper chromatography Separate a mixture of pigments based on their different physical and chemical properties.
	Calculate the Rf (retardation factor) value for individual components separated by paper chromatography.
	Use paper chromatography to analyze the photosynthetic pigments extracted from plant leaves.
	Relate the separation of pigments to the concepts of polarity and solubility.
CLO6	Mitosis and meiosis
	Identify and differentiate the various phases of mitosis in prepared animal (e.g., whitefish blastula) and plant (e.g., onion root tip) cells.
	Describe the key cellular events and chromosome movements that occur during each stage of the cell cycle and both mitosis and meiosis.
	Compare and contrast the products and purpose of mitosis and meiosis, explainin how meiosis generates genetic variation through independent assortment and crossing over.
CLO7	DNA extraction
	Explain the function of each chemical component (e.g., detergent, salt, alcohol) used in the process of extracting DNA from a biological sample.
	Isolate and purify DNA from a common plant or animal source using basic laboratory techniques.

7 of 12

	Students who successfully complete this course will be able to:
	Visualize the extracted DNA and describe its macroscopic appearance and properties. Articulate the significance of DNA isolation in molecular biology, including its applications in genetic research and forensic science.
CLO8	Genetics Solve basic genetics problems involving monohybrid and dihybrid crosses using Punnett squares.
	Apply the principles of probability to predict the inheritance patterns of specific traits.
	Distinguish between genotype and phenotype and explain their relationship in simple inheritance patterns.
CLO9	Frog dissection Identify and describe the major external features of a preserved frog, including sexually dimorphic characteristics
CLO10	Plant Diversity Understand and identify the various groups of plants including moss, ferns, gymnosperms and angiosperms.
	Outline plant lifecycles
	Identify and draw reproductive structures

11. Topical Outline

Lab 2.0

Practicum 0.0

3. Catalog Description

For display in the

online catalog

This laboratory course offers hands-on exploration of plant biology, designed to reinforce and expand upon concepts introduced in the BIOL 163 lecture. Students will investigate plant anatomy, physiology, and evolutionary relationships through guided experimentation and observation. Lab activities include microscope-based examination of living plant cells, osmosis, and genetic exercises. Students will learn to identify and differentiate key plant structures—roots, stems, leaves, flowers, and fruits. Students will analyze representative specimens from major land plant groups gaining insight into their reproductive strategies and developmental stages. Emphasis is placed on the scientific method, accurate data collection, and classification

skills to build a solid foundation in plant science.

4. Requisites

Prerequisites

None

Corequisites

For the first attempt, BIOL 163 lecture must be taken with BIOL 163L. If the student should fail either lecture or lab after the first attempt, then they may take the individual failed section.

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course may be used to satisfy the lab science general education requirement.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

10. Course Learning Outcomes

Learning Outcomes

Students who successfully complete this course will be able to:

	Students who successfully complete this course will be able to:
CLO1	Microscope lab Properly use and handle a compound light microscope to observe and focus on plant specimens.
	Calculate the total magnification of the microscope and explain the relationship between magnification and the field of view.
	Describe the function of the main microscope components, including the objective lenses, stage, and diaphragm. Prepare and observe wet mount slides of various plant samples.
CLO2	Plant cell lab Identify the key structures of a plant cell, such as the cell wall, plasma membrane, nucleus, vacuole, and chloroplasts.
	Distinguish between different types of plant cells and tissues, such as parenchyma collenchyma, and sclerenchyma, based on their cellular characteristics and functions.
	Observe and describe the process of cytoplasmic streaming in living plant cells.
CLO3	Monocot and dicot anatomy Root, stem, and leaf
	Compare and contrast the internal structure of monocot and dicot roots, stems, and leaves using prepared microscope slides.
	Identify the arrangement of vascular bundles (xylem and phloem) in both monoco and dicot stems and roots.
	Recognize the differences in leaf venation patterns (parallel vs. net-like) and stomatal distribution between monocots and dicots.
	Correlate the anatomical features of monocot and dicot organs with their specific functions within the plant.
CLO4	Genetics and plant breeding dry lab Explain and apply the basic principles of Mendelian genetics, to predict outcomes in plant crosses.

	Students who successfully complete this course will be able to:
	Construct and interpret Punnett squares to determine genotypic and phenotypic ratios of offspring from monohybrid and dihybrid crosses.
	Analyze hypothetical or provided data from plant breeding experiments to understand inheritance patterns and selection methods.
	Describe the goals and applications of plant breeding for improving crop yield, quality, and resilience.
CLO5	Mosses, liverworts, and ferns (non-seed plants)
	Compare and contrast the morphology and life cycles of bryophytes (mosses and liverworts) and seedless vascular plants (ferns).
	Identify and differentiate between the gametophyte and sporophyte generations in mosses and ferns.
	Observe the key structures associated with reproduction.
	Relate the adaptations of these plant groups to their ecological niche and evolutionary history.
CLO6	Gymnosperms and angiosperms (seed plants)
	Describe the major characteristics that distinguish gymnosperms from angiosperms.
	Identify and compare the male and female reproductive structures (cones) of a gymnosperm (e.g., a pine tree).
	Dissect a flower to identify and label its component parts, distinguishing between male (stamens) and female (carpels) structures.
	Explain the process of double fertilization in angiosperms and the development of the seed and fruit.
	Distinguish between fruits and seeds and classify different fruit types based on their development and structure.
CLO7	Paper chromatography Separate a mixture of pigments based on their different physical and chemical properties.

7 of 12

	Students who successfully complete this course will be able to:
	Calculate the Rf (retardation factor) value for individual components separated by paper chromatography.
	Use paper chromatography to analyze the photosynthetic pigments extracted from plant leaves.
	Relate the separation of pigments to the concepts of polarity and solubility.
CLO8	DNA extraction Explain the function of each chemical component (e.g., detergent, salt, alcohol) used in the process of extracting DNA from a biological sample.
	Isolate and purify DNA from a common plant source using basic laboratory techniques.
	Visualize the extracted DNA and describe its appearance and properties. Articulate the significance of DNA isolation in molecular biology, including its applications in genetic research and forensic science.

For display in the

online catalog

This course will introduce students to the organisms and ecosystems in their natural settings. Through numerous field trips, students will gain an appreciation for local biodiversity and learn how to identify and classify the organisms they encounter and the habitats they visit. Students will also gain an understanding of the ecological roles these species play in their habitats. Students must provide their own transportation to off-campus lab locations.

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course will fulfill the Lab Science general education requirement for graduation and transfer. This course is designed for bachelor-level degree programs in Biology, Environmental Science, and other science disciplines. Ecology benefits students transferring to four-year institutions since it is frequently a prerequisite for upper level courses in the ecological/environmental field of study.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

1. Course Information

Subject BIOL - Biology

School Science, Technology, Engineering,

Mathematics

Course Title Marine Biology Lab

2. Hours

Semester Hours 1.0

Lecture 0

Lab 2.0

Practicum 0

3. Catalog Description

For display in the

online catalog

This course is a field and laboratory approach to the understanding of the complexity of marine organisms including the study of ecological principles that act to structure marine associations. Emphasis on local coastal and estuarine communities and species diversity. Students will be required to provide their own transportation to offsite laboratory locations.

4. Requisites

Prerequisites

BIOL 265L : Marine Biology Lab

EXHIBIT B-20

BIOL-161

Corequisites

For the first attempt BIOL-265 Marine Biology is considered a corequisite. If the student should fail either lecture or lab after the first attempt then they may take the individual failed section.

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

Students having completed Biology I and Biology II express an interest in 200 level courses, especially Marine Biology in the summer. Marine Biology benefits students transferring to four year institutions, since it is frequently a requirement for a marine biology major and a prerequisite for upper level courses in the marine field.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

General Education

Lab Science

General Education Proposed

Status

8. Consistency with the Vision and Mission Statements, the Academic Master Plan, and the strategic initiatives of the College

Please describe how this course is consistent with Ocean County College's current Vision Statement, Mission Statement, Academic Master Plan, and the strategic initiatives of the College:

	Add item		
1	Demonstrating the college's commitment to offer comprehensive educational programs that develop intentional learners of all ages. (Mission Statement)		
2	Seeking to ensure that students will thrive in an increasingly diverse and complex world (Vision Statement).		
3	Preparing students for successful transfer to other educational institutions and/or for entrance into the workforce. (Academic Master Plan).		
4	Seeking to empower students through the mastery of intellectual and practical skills. (Academic Master Plan).		
5	Challenging students to transfer information into knowledge and knowledge into action. (Academic Master Plan).

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Discuss the scientific principles that govern the organization and perpetuation of
	organisms and associations.

	Students who successfully complete this course will be able to:
CLO2	Describe how the above principles operate somewhat differently in the ocean than on land because of the physical properties of water.
CLO3	Explain the origin, evolution, and classification of marine life, with special emphasis on the process of how natural selection has resulted in the great diversity of marine plants and animals.
CLO4	Describe the organism as the fundamental unit of ecology and explain the structure and dynamics of marine populations, communities, and ecosystems.
CLO5	Discuss the importance of the world's oceans as sources of food, as reservoirs of minerals, as major suppliers of oxygen and regulators of climate, and as the ultimate dumping ground for human waste materials.

11. Topical Outline

Beginner English Language is an introductory course for students who are developing foundational skills in English. It focuses on foundational reading, writing, listening, and speaking

skills. Students engage with simplified texts, listen to short audio materials, and complete everyday communication tasks. Grammar instruction includes basic sentence structures, common verbs, pronouns, and vocabulary for daily life. Activities include conversations, roleplays, picture-based responses, and writing about familiar topics. Emphasis is placed on accuracy, comprehension, and building confidence in both academic and real-world contexts.

High-Beginner English Language is designed for students who have foundational English proficiency and are ready to strengthen their skills. Students will read short passages, complete

structured writing tasks such as paragraphs and process steps, and improve listening comprehension through guided practice. Instruction covers past and future verb forms, modals, and time expressions. Speaking activities focus on expressing opinions, clarifying ideas, and participating in discussions about familiar topics. This course supports the transition from foundational English to more independent communication in real-life and academic settings

Subject ESOL - ESOL

School Arts and Humanities

Course Title Intermediate English Language

2. Hours

Semester Hours 4

Lecture 4

Lab 0

Practicum 0

3. Catalog Description

For display in the

online catalog

Intermediate English Language builds students' ability to communicate effectively in increasingly complex academic and real-world situations. Students read and analyze various

text types, write structured paragraphs and short essays, and respond to audio recordings with greater detail. Grammar instruction includes present perfect, past continuous, sentence variety, and the use of gerunds and infinitives. Oral communication activities emphasize clarity, vocabulary use, and interaction in discussions, presentations, and interviews. The course prepares learners for advanced ESL study and enhanced confidence in English-speaking environments.

4. Requisites

Prerequisites

Placement Test Scores

Corequisites

None

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course is needed to help English language learners further cultivate key reading, writing, listening, and speaking skills and advance to the next level of their English learning pathway.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

No

If the course does not satisfy a general education requirement, which of the following does it satisfy:

Elective

8. Consistency with the Vision and Mission Statements, the Academic

Master Plan, and the strategic initiatives of the College

Please describe how this course is consistent with Ocean County College's current Vision Statement, Mission Statement, Academic Master Plan, and the strategic initiatives of the College:

	Add item
1	Ocean County College empower diverse learners to achieve their goals while enriching the communities we serve (Mission)
2	To inspire our students and community to learn, discover, and thrive (Vision)
3	Accessible: We prioritize open education and actively promote inclusivity, equity, and belonging, continually learning and adapting to ensure every student has the opportunity to succeed (Values).
4	Opportunity-Focused: We place students at the heart of everything we do, providing transformative academic and career pathways and practical skills to help learners achieve their educational, personal, and professional goals (Values).

online catalog

Advanced English Language is an upper-level English language learner course that prepares students for college-level work and professional communication. Students analyze academic

texts, write multi-paragraph essays with attention to purpose, audience, and style, and synthesize information from reading and listening. Grammar instruction includes conditionals, passive voice, noun/adjective clauses, and advanced sentence structures. Speaking tasks involve formal presentations, debates, and group discussions using academic vocabulary and clear pronunciation. This course equips students with the skills necessary for English 151 and other college-level coursework.

3. Catalog Description

For display in the

online catalog

This course examines the history of interpreting, interpreting in a variety of specialized settings,

the interpreting process, attitudes, and the role of the interpreter. Ideological components, principles, and practices of interpreting for the Deaf community will be examined. Students will learn about national certification and educational licensure. Students are required to accrue 15 mandatory field observation hours observing sign language interpreters with five or more years of experience. Students in this course are required to submit a graduation portfolio which must include various topics in interpreting.

4. Requisites

Prerequisites

Students must complete the following courses with a minimum grade of C; ASLN 104, ASLN 112, ASLN 115, ASLN 125

Corequisites

ASLN 105, ASLN 201

5. Course Type

Course Type for

vocational (approved for Perkins funding)

Perkins Reporting

6. Justification

Describe the need

for this course

Ocean County College, in establishing this course, is responding to many requests for basic ASL instruction. This course allows students to acquire ASL skills. ASL is the everyday language of 500,000 Americans; it is the third largest language "spoke" in the United States.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

No

If the course does not satisfy a general education requirement, which of the following does it satisfy:

Program-specific requirement

8. Consistency with the Vision and Mission Statements, the Academic Master Plan, and the strategic initiatives of the College

Please describe how this course is consistent with Ocean County College's current Vision Statement, Mission Statement, Academic Master Plan, and the strategic initiatives of the College:

	Add item
1	Provide a challenging, coherent, and integrated curriculum, including high-quality instructional and cultural programs for a diverse population of students.
2	Establish a shared commitment to high and meaningful educational and ethical standards.
3	Prepare students for successful transfer to other educational institutions.
4	Prepare students for a rewarding life of personal growth and life-long learning.

3. Catalog Description

For display in the

online catalog

Students compose and revise <u>analytical</u> <u>expository</u> essays <u>of a minimum of 3,500 words of formal, academic writing.</u> <u>totaling 3500 words, minimum.</u> Through a series of <u>primarily</u> text-based writing assignments, the course reinforces and stresses the further development of critical reading and thinking, ethical reasoning, the writing process, and information literacy.

4. Requisites

Prerequisites

ENGL 095 with grade of C or higher, or English placement requiring noremediation.

Corequisites

No remediation

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

As the first course in the general education "Communication" sequence, ENGL 151 equips students with the writing, critical thinking, and information literacy skills necessary is the first course in the general education "Communication" sequence that is required for success in college and their careers. all OCC degree programs. Through a structured approach to analytical writing, students will craft well-supported arguments, engage ethically with sources and tools, and participate in academic discourse across disciplines.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

General Education

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Writing: Apply the writing process to <u>research</u> , <u>outline</u> , <u>invent</u> , draft, revise, and edit academic <u>essays for various audiences and purposes</u> . <u>essays</u> .
CLO2	<u>CriticalThinking:</u> Compose essays that <u>demonstrate</u> <u>assert and develop</u> a <u>command</u> <u>of organization, development, voice, and rhetorical strategies.</u> <u>debatable thesis</u> <u>statement using relevant evidence and employing academic discourse.</u>
CLO3	Invent original, debatable arguments that are supported with logical reasoning, textual evidence, and multiple perspectives. Ethical Reasoning: Analyze and synthesize textual evidence to produce academic writing with attribution. This

	Students who successfully complete this course will be able to:
	includes evaluating issues and making decisions based on consideration of virtue,
	values, beliefs, rights, and obligations.
CLO4	Read, analyze and annotate a variety of sources to identify central ideas, rhetorical
	strategies, and underlying assumptions. Information Literacy: Evaluate and
	integrate sources using proper documentation.
<u>CLO5</u>	Assess the ways genre, audience, purpose, and context shape written and
	multimodal arguments and apply appropriate conventions across modalities.
<u>CLO6</u>	Develop ethical arguments that synthesize and critically evaluate issues,
	considering bias, values, beliefs, rights, and obligations to determine a position
	within ongoing academic conversations.
<u>CLO7</u>	Conduct academic research to discern and use credible sources/tools and
	document borrowed information in MLA format, avoiding plagiarism or other
	forms of unauthorized assistance.
CLO8	Produce authentic, original written work that demonstrates an understanding of
	the ethical considerations, including transparency and documentation, in the use
	of Artificial Intelligence (AI) tools for academic writing.
CLO9	Demonstrate self-awareness and growth as a writer through reflection, peer
	review, and revision.

11. Topical Outline

(include as many themes/skills as needed)

	Major Themes/ Skills	Assignments (Recommended but not limited to)	Assessments (Recommended but not limited to)	Course Learning Outcome(s)
TO1	Active Reading & Critical Analysis: a) Annotation and note- taking strategies b) Identifying central ideas and rhetorical moves c) Recognizing assumptions and perspectives The Essay a) Introduction to	1) Close reading assignments 2) Textual annotations 3) Reading Journals 4) Small group or class discussion-led analysis 1) Reading source material 2) Class discussion 3) Group work 4) In-class writing	Reading quizzes, writer's notes, reading journals, essays Quizzes, Assigned essays	CLO4, CLO6, CLO7 CLO1

	Major Themes/ Skills	Assignments (Recommended but not limited to)	Assessments (Recommended but not limited to)	Course Learning Outcome(s)
	academic discourse and college level writing b) An essay's purpose, voice, and audience c) Identifying and focusing on an appropriate essay topic			
TO2	The Writing Process: a) Research b) Invention and brainstorming c) Outlining and drafting d) Revision for organization and development e) Editing for grammar and clarity f) Reflection on growth and process Writing a) Invention/ brainstorming b) Drafting c) Revision d) Editing e) Developing assertions with supporting detail f) Building coherent paragraphs g) Creating a functional essay structure h) Responding	1) Reading source material 2) Class discussion 3) In-class invention, drafting, revising, and drafting 4) In-class revision 5) In-class editing workshops 2) Scaffolded in-class assignments or homework 6) Homework on each step 3) Peer review 4) Reflections a), b), c) and d).	Drafts and final essays, inclass writing assignments to assess originality, revision portfolio demonstrating substantive changes Assigned essays, assigned writing, quizzes	CLO1, CLO2, CLO3, CLO4, CLO7, CLO8, CLO9 CLO1

	Major Themes/ Skills	Assignments (Recommended but not limited to)	Assessments (Recommended but not limited to)	Course Learning Outcome(s)
	critically to source readings i) Logically synthesizing information from source readings j) Observing grammatical and mechanical writing conventions.			
TO3	Academic Writing & Rhetorical Situation: a) Academic tone, stance, and conventions b) Audience, purpose, and context c) Rhetorical strategies (appeals, style, organization) d) Adapting writing to disciplinary expectations e) Logical fallacies f) Bias Critical Thinking a) Argument i) Parts ii) Approaches iii) Types of argument iv) Counter argument v) Using Logic b) Using sources	1) Rhetorical situation analyses 2) Audience adaptation exercises 3) Editing for tone and stance 4) Revision activities for rhetorical effectiveness 1) Readings 2) Class discussion 3) Presentations 4) Group projects 5) Writing	Essay revisions emphasizing rhetorical choices, quizzes on academic conventions, essays Assigned essays, assigned writing, quizzes	CLO2, CLO5 CLO2
TO4	Genre & Multimodality: a) Genre, audience, purpose, and context b) Conventions across	 Analyses of texts in diverse genres Multimodal project Reflections on how 	Multimodal project, genre analysis essay, presentation assessing audience and purpose	CLO5 CLO3

	written genres (analysis, reflection, response) c) Introduction to multimodal composition (visual, oral, digital) Ethical Reasoning a) Evaluating issues b) Developing arguments c) Reaching decisions d) Analysis of the components of ethical issues	Assignments (Recommended but not limited to) medium shapes rhetorical choice 1) Readings 2) Class discussion 3) Presentations 4) Group projects 5) Writing	Assessments (Recommended but not limited to) alignment Assigned essays, assigned writing, quizzes	Course Learning Outcome(s)
TO5	Argumentation: a) Drafting debatable, original thesis statements b) Logical reasoning and textual evidence c) Multiple perspectives and counterarguments d) Logical organization Information Literacy a) Using the library b) Gathering sources c) Evaluating sources d) Documentation (conducting research honestly and skillfully; accurate use of MLA documentation;)	1) Argument mapping 2) Claim-evidence- reasoning drills 3) Counterargument workshops 4) Structured debates 5) Drafting and revising argumentative essays 1) Readings 2) Work in the library 3) Work with sources 4) Class discussion 5) Presentations 6) Writing	Argumentative essay, rhetorical analysis of argumentative texts, debates, presentations Assigned essays, assigned writing, quizzes	CLO2, CLO3. CLO8 CLO4
<u>TO6</u>	Ethical Reasoning in Writing: a) Evaluating issues and perspectives ethically	 Readings on the ethical considerations of current debatable topics Exercises on integrating 	Ethical argument essay, academic integrity quiz, annotated bibliography entries with evaluative	<u>CLO3, CLO6,</u> <u>CLO8</u>

	Major Themes/ Skills	Assignments (Recommended but not limited to)	Assessments (Recommended but not limited to)	Course Learning Outcome(s)
	b) Developing arguments grounded in ethical reasoning c) Responsible synthesis of textual evidence d) Proper attribution and acknowledgement	and attributing sources 3) Drafting ethical argument essays	notes	
<u>TO7</u>	Information & Technology Literacy: a) Using library databases and resources b) Employing digital tools for research and writing c) Evaluating and synthesizing peer- reviewed sources d) MLA documentation and citation practices	1) Library orientation or information literacy session 2) Database searches 3) Source evaluation 4) Research log 5) Draft and revise a research-based essay using MLA format	Research-based essay, annotated bibliography, MLA format documentation quiz, writer's notes	<u>CLO4, CLO5,</u> <u>CLO7</u>
<u>TO8</u>	Metacognition & Reflection a) Self-assessment of writing growth b) Structured reflection on the writing process and revisions c) Peer feedback and collaboration d) Goal setting for continued improvement	1) Reflective journals 2) Peer review workshops 3) Self-assessment checklists 4) Final portfolio	Reflection essay, peer review participation, final portfolio with reflective introduction	CLO1, CLO9

12. Methods of Instruction

In the structuring of this course, what major methods of

instruction will be utilized?

- Lecture, discussion, and small group work in college-level language skills, the writing process, and information literacy
- Reading assignments from the textbook, current periodicals, or the Internet
- Formal in- and out-of-class writing assignments (e.g., reflective journals, article summaries and analyses, essays, and collaborative projects)
- Digital composing, revising, and editing using word processing and online platforms
- Library/information literacy sessions
- Peer review workshops
- Instructor-student writing conferences
- Metacognitive reflection activities
- Use of appropriate instructional media
- Case-studies or other real-world simulations
- Support services may be provided depending on available college resources (e.g., Writing Center tutors, etc.) o Lecture, discussion, and small group work in college level language skills, the writing process, and information literacy.o Reading assignments from the textbook, current periodicals, or the Internet.o Appropriate in-class and out-of-class writing assignments, e.g., reflective journals, article summaries and analyses, essays, and collaborative projects (a minimum of 3500 words of finished writing).o Computer composing, revising, and editing (when computer classrooms are available).o Instructor-student writing conferences.o Use of appropriate instructional media.o Case-studies or other real-world simulations.o Support services may be provided depending on available college resources, e.g., Writing Skills Lab, Writing Computer Lab, and Center for Academic Services.

online catalog

This course is recommended for engineering, computer science, and Mathematics majors. The topics include: sets, logic, proofs, combinations, probability, graph theory and Boolean algebra.

4. Requisites

Prerequisites

MATH 265 with B or better, or MATH 266

Corequisites

MATH 266, or permission of instructor

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course has become an important tool for students in mathematics, science, computer science and/or engineering degrees to improve their mathematical skills in a variety of fields. It provides the background required for insight into more advanced courses in pure mathematics. It is a required course for mathematics and computer science majors at many four-year institutions.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

1. Course Information

Subject BIOL - Biology

School Science, Technology, Engineering,

Mathematics

Course Title Principles of Biological Science <u>Lecture</u>

2. Hours

Semester Hours <u>3.0</u> <u>4.00000</u>

Lecture 3.00

Lab <u>0.0</u> 2.00

Practicum <u>0.0</u>

3. Catalog Description

For display in the

online catalog

A one-semester laboratory course designed for those who have not had a high school science background, or for those who have graduated from high school ten or more years ago. Includes a study of the cell, its physiology and relationship to the more complicated organism. A study of genetics and heredity as well as evolution is included. It is recommended that this course not be taken concurrently with or after a science course with a higher course number.

4. Requisites

Prerequisites

None

Corequisites

For the first attempt BIOL 114L is considered a corequisite. If the student should fail either lecture or lab after the first attempt then they may take the individual failed section. None

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course is needed for students entering college who have not had a high school biology course or who wish to reinforce their biological science background before going on to further study.

The course addresses the need for greater scientific literacy by introducing students to some basic concepts in the living world and how these concepts are interrelated. The course also addresses the need of the students to develop and use critical thinking

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Analyze modern cell theory
CLO2	Examine the principles of natural selection as identified by Darwin and explain how natural selection is the basis of the theory of evolution
CLO3	Relate the basic principles of chemistry to the life processes
CLO4	Contrast and compare the principles of classifications
CLO5	Compare several different ways organisms are classified
CLO6	Describe the diversity within plant life and animal life
CLO7	Identify and differentiate between prokaryotic and eukaryotic cells
CLO8	Discuss the relationships among chromosomes, genes, and DNA; and their relationships to nucleic acids
CLO9	Explain the processes of diffusion, active transport, photosynthesis, and respiration

BIOL 261: Ecology Lecture

EXHIBIT B-30

For display in the online catalog

This course is an introduction to ecology emphasizing the physical and biological factors affecting distribution, abundance and adaptations of organisms. Statistical analyses of population, community and ecosystem structure and function are performed. Fundamental concepts of behavioral ecology and evolutionary processes in ecology are stressed.

Consideration of ecological principles is emphasized by field study in natural habitats and in the laboratory. Students will be required to travel to offsite laboratory locations.

4. Requisites

Prerequisites

BIOL 161

Corequisites

For the first attempt BIOL 261L is considered a corequisite. If the student should fail either lecture or lab after the first attempt then they may take the individual failed section. None

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course will fulfill the Lab Science general education requirement for graduation and transfer. This course is designed for bachelor-level degree programs in Biology, Environmental Science, and other science disciplines. Ecology benefits students transferring to four-year institutions since it is frequently a prerequisite for upper level courses in the ecological/environmental field of study.

7. General Education

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Describe the scope of natural history, including habitats and resident organisms.
CLO2	Engage in experimental and field ecology and generalize from the dataexamined.
CLO2 CLO3	Describe the organism as the fundamental unit of ecology and discuss the structure and dynamics of populations, communities, and ecosystems.
CLO3	Discuss the central position of evolutionary thinking in the study of ecology.
CLO4 CLO5	Explain how the qualities of all ecological systems express the evolutionary adaptations of their component species.

1. Course Information

Subject BIOL - Biology

School Science, Technology, Engineering,

Mathematics

Course Title Marine Biology <u>Lecture</u>

2. Hours

Semester Hours <u>3.00000</u> <u>4.00000</u>

Lecture 3.00

Lab <u>2.00</u>

Practicum

3. Catalog Description

For display in the online catalog

This course <u>explores</u> is a field and laboratory approach to the <u>understanding of the</u> complexity of marine organisms including the study of ecological principles that act to structure marine associations. Emphasis on local coastal and estuarine communities.

4. Requisites

Prerequisites

BIOL 161

Corequisites

For the first attempt BIOL 265L is considered a corequisite. If the student should fail either lecture or lab after the first attempt then they may take the individual failed section. None

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

Students having completed Biology I and Biology II express an interest in 200 level courses, especially Marine Biology in the summer. Marine Biology benefits students transferring to four year institutions, since it is frequently a requirement for a marine biology major and a prerequisite for upper level courses in the marine field.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

General Education

Category

Lab Science

General Education Approved

Status

8. Consistency with the Vision and Mission Statements, the Academic Master Plan, and the strategic initiatives of the College

Please describe how this course is consistent with Ocean County College's current Vision Statement, Mission Statement, Academic Master Plan, and the strategic initiatives of the College:

	Add item
1	Mission/Vision: "Ocean County College provides affordable, student-centered, high quality educational experiences that prepare and empower diverse learners to contribute to and succeed in global societies."
2	Academic Master Plan: "The School of STEM's mission is for STEM faculty and staff to provide and support the delivery of high quality, relevant, and emerging STEM courses, academic certificates, and associate degree programs to Ocean County learners in their pursuit of achieving their academic goals."

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Discuss the scientific principles that govern the organization and perpetuation of organisms and associations.
CLO2	Describe how the above principles operate somewhat differently in the ocean than on land because of the physical properties of water.
CLO3	Explain the origin, evolution, and classification of marine life, with special emphasis on the process of how natural selection has resulted in the great diversity of marine plants and animals.
CLO4	Describe the organism as the fundamental unit of ecology and explain the structure and dynamics of marine populations, communities, and ecosystems.
CLO5	Discuss the importance of the world's oceans as sources of food, as reservoirs of minerals, as major suppliers of oxygen and regulators of climate, and as the ultimate dumping ground for human waste materials.

3. Catalog Description

For display in the online catalog

This course is designed for students in a variety of fields for which a conceptual undersatnding of college algebra topics is appropriate. Continuous and discrete functions will be studied from graphical, numerical, verbal, and algebraic perspectives with applications to diverse disciplines. Topics will include linear, quadratic, polynomial, exponential, logarithmic absolute value, radical, and rational functions and their application. This course will NOT satisfy the prerequisite for Precalculus courses.

4. Requisites

Prerequisites

None

Corequisites

None

5. Course Type

Course Type for non-vocational (not approved for Perkins

Perkins Reporting funding)

6. Justification

Describe the need

for this course

This course will provide students with the mathematical knowledge needed to integrate mathematics into their chosen area of study or career path. It is designed for students whose major does not require rigorous symbolic manipulation but requires an increased understanding of functions and graphs. Students planning a major in education, social sciences, allied health, and humanities are among those who will benefit from this course.

7. General Education

Will the college submit this course to the statewide General Education Coordinating Committee for approval as a course, which satisfies a general education requirement?

Yes

General Education

8. Consistency with the Vision and Mission Statements, the Academic Master Plan, and the strategic initiatives of the College

Please describe how this course is consistent with Ocean County College's current Vision Statement, Mission Statement, Academic Master Plan, and the strategic initiatives of the College:

	Add item
1	Through the use of technology to perform problem-solving tasks, the proposed course encourages students to think critically about advanced mathematical concepts encountered in their everyday world. By expanding students' access to quantitative concepts utilized in disciplines other than the science, math, and engineering fields, it thus serves to contribute to the fulfillment of the college mission to "offer comprehensive educational programs that develop intentional learners of all ages and ensure the full assessment of student learning in these programs." By providing students the conceptual and technological tools to master mathematical problems that they can expect to encounter in their daily lives, this course also contributes to the fulfillment of the divisional goal to prepare "students to thrive in a complex and challenging world" (FY15 Planning Documents of Academic Affairs, 2013). Further, this course will also address the school's goal to provide courses that help "students to master the fundamental concepts of each discipline, attain the competencies that allow them to critically think, problem-solve, continue their education, and become productive citizens of society" (FY15 Planning Documents of the School of Math, Science, & Technology, 2013).

10. Course Learning Outcomes

Learning Outcomes

	Students who successfully complete this course will be able to:
CLO1	Distinguish between a relation and a function when given graphs, tables, or diagrams.
CLO2	Relate verbal descriptions of functions to mathematical models.
CLO3	Describe the mathematical characteristics of linear, exponential, logarithmic, polynomial, and rational functions.
CLO4	Examine charts and graphs to determine the zeros and intercepts of a function.
CLO5	Solve equations and inequalities with the aid of charts, graphs, calculators, and/or

	Students who successfully complete this course will be able to:
	computer software.
CLO6	Graph functions and two-variable equations with the aid of a graphing utility.
CLO7	Perform basic algebraic manipulations in the context of solving practical problems.
CLO8	Apply function concepts and mathematical modeling to practical applications.

11. Topical Outline

(include as many themes/skills as needed)

	Major Themes/ Skills	Assignments (Recommended but not limited to)	Assessments (Recommended but not limited to)	Course Learning Outcome(s)
TO1	Functions and Mathematical Models a. Defining functions by tables, graphs, and formulas. b. Introduce Domain, Range, and Average Rate of Change.	Homework	Quizzes & Exams	CLO1, CLO7

TO5	Quadratic Functions and Models a. Quadratic functions and graphs. Understanding intercepts and extrema, b. Fitting Quadratic Models to data.	Homework	Quizzes & Exams	CLO2, CLO3, CLO4, CLO5, CLO6, CLO7, CLO8
ТО6	Polynomial Models a. Polynomial functions and graphs. b. Fitting Polynomial Models to data.	Homework	Quizzes & Exams	CLO2, CLO3, CLO4, CLO5, CLO6, CLO7, CLO8
ТО7	Bounded Growth Models a. Logistic Functions and graphs. b. Fitting Logistic Models to data.	Homework	Quizzes & Exams	CLO2, CLO3, CLO4, CLO5, CLO6, CLO7, CLO8
TO8	Cumulative Assessment Use modeling techniques to model real data.	Research Project	Research Project	CLO2, CLO3, CLO4, CLO5, CLO6, CLO7, CLO8

12. Methods of Instruction

In the structuring of this course, what major methods of instruction will be utilized? o Lecture

- o Class discussion
- o Group Projects and Presentations
- o Computer applications
- o Graphing utility applications
- o Laboratory investigations
- o Writing

13. General Education Goals Addressed by this Course (this section is to fulfill state requirements)

Information	
Communication-Written and Oral	
Quantitative Knowledge and Skills Yes	
Related Course All Learning Outcome	
Related Outline All Component	
Assessment of General Education Goal (Recommended but not limited to)	
Individual Student Exams	
Scientific Knowledge and Reasoning	
Technological Competency	
Information Literacy	
Society and Human Behavior	
Humanistic Perspective	
Historical Perspective	

14. Needs

Instructional

Materials (text

etc.):

Appropriate textbook

Technology Needs:

Access to PC computer software or tables with graphing utilities

Human Resource

Needs (Presently

Employed vs. New

Faculty):

Facility Needs:

Library needs:

15. Grade Determinants

The final grade in the course will be the cumulative grade based on the following letter grades or their numerical equivalents for the course assignments and examinations

A: Excellent

B+: Very Good

B: Good

C+: Above Average

C: Average

D: Below Average

F: Failure

I: Incomplete

R: Audit

For more detailed information on the Ocean County College grading system, please see Policy #5154.

16. Board Approval

History of Board

approval dates

Board of Trustees Approval Date: January 27, 2014 Board of Trustees Approval Date: November 3, 2016
